

BLUEWATER CHAPTER (GREY AND BRUCE)

Several executive have left the committee in the last year. Some members having retired, we have had to replace the Executive. A new Executive is now in place and has held the first planning meeting for the 2011 year. The Chapter focuses on bringing educational dinner meetings to those who, because of workload, find it difficult to attend events on a regular basis, especially those events out of the region.

Our dinner meetings are attended often by a majority of those working in Long-Term Care at the management level. Our membership numbers have remained stable due to the student initiative. Some members are more involved with the regional Geriatric Education Cooperative which has a broader membership than the GNA Chapter and performs a similar function. In the past year, we held a dinner meeting with a speaker from Parkwood Hospital regarding the South West Region Wound Care Framework. This year, it was decided that we would host the Registered Dietitian on the topic of *Nutritional Requirements of Seniors and Supplements to Maintain Good Health*.

Respectfully submitted,
Trish Shouldice, Past President
