

## Gerontological Nursing Association

P.O. Box 368, Postal Station 'K'  
Toronto, Ontario M4P 2G7

### **Perspectives Book/Video Report Guidelines**

Perspectives' purpose in having a review section is to provide an opportunity to share information among gerontological nurses and that includes the tools we use. It doesn't have to be a review of a book – it could be a video or learning package etc.

The basic components of a book report answer the following questions:

- What's this book about?
- What did you like about it? (e.g. organization, new information/insights, new ways of presenting information etc.)
- Who should read this book?

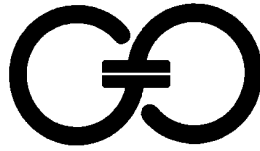

Answer these questions and you have a book (or video or learning package, etc.) review.

Length: 1-3 pages double spaced (approximate). Include the full reference for the readers.

### **Perspectives Clinical Corner Guidelines**

This section offers practitioners an opportunity to share their experiences and opinions on practice issues. It can be a case study or an anecdotal report of new techniques you are trying out, things/approaches that worked or didn't work, and lessons learned. It can be about new equipment/products, a different approach to patient care, documentation, staffing, education of patients' families and/or staff – you name it and your colleagues will probably be interested.

Length: 3-5 pages double spaced (approximately) and include your full reference in case they wish to contact you for further information.
